# Welcome to Viswam Edutech

We're pioneering a transformative approach to computer education for grades 1 to 10. As the world evolves, with 65% of today's primary school kids projected to work in new job types and India's education system facing challenges, **we focus on the crucial question: Is our kid future-ready?**

Acknowledging the pivotal role of coding in a future dominated by data science and computer science, in line with the **NEP 2020**, our vision integrates coding into the education system as more than just a skill but a mindset fostering problem-solving, creativity, and innovation. Our dynamic book is the gateway for young minds to explore the captivating world of technology.

Join us at Viswam Edutech Schoollabs, where excitement meets innovation, and the future is coded!

WHY SHOULD KIDS LEARN
CODING?

- Critical Thinking
- Problem Solving
- Logical Reasoning
- Decision Making

Coding Develops

- Creator Mindset
- Algorithmic Thinking
- Tech Savviness
- Intelligence Quotient

{CODE CHAMP}

Simplify Learning

We're committed to making computer science and programming accessible to all students by breaking down complex concepts into digestible lessons.

Ignite Passion for Technology

Our goal is to inspire a love for technology, fostering critical thinking and problem-solving skills among students.

Foundational Concepts

Introduce students to the basics of computer education and coding languages.

Critical Thinking Hub

Code Champ aims to cultivate logical reasoning skills, providing a mindset that extends beyond code

Future-Ready Skills

Equip the next generation with essential skills for the future workforce

Engaging Curriculum

Our structured curriculum complements existing educational standards, ensuring an enriching learning experience

Diverse Skill Exposure

Tailored to captivate student interests, Code Champ covers a spectrum of skills including:

MOVIE MAKER SCRATCH PIVOT STICK
GOOGLE SKETCHUP PAINT.NET
